	Examiner Joseph C. Merek	Art Unit 3727	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Rye (US 4,952,754). Regarding claim 1-3, see Fig. 1, where 30 is the flange. It is a different material than the box as it is shown in section differently. Moreover, it has to be capable of being snapped over the box. Regarding claims 6, 8, and 9, see Figs. 1-4.

Claims 1-3, and 6-9 rejected under 35 U.S.C. 102(b) as being anticipated Nix et al (US 4,724,281). Regarding claim 1-3, the flange includes the caulk bead as seen in Fig. 6. The caulk is a different material than the box. Regarding claim 6-9, see Figs. 1-8.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3727

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nix et al (US 4,724,281). Regarding claim 4 and 5, Nix et al does not teach the specific materials. Official notice is taken that it is well known to employ the claimed materials for junction boxes and caulking. It would have been obvious to employ the claimed materials to take advantage of their inherent properties.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gilleran (US 6,395,984) and Bashford (US 6,586,679) are both cited for their structure.
